

I CLAIM:

1. A pen comprising:
a housing including a slot formed therein,
an ink reservoir received in said housing, and
5 a sheet material received in said housing and movable out of
said housing via said slot of said housing for noting purposes.
2. The pen as claimed in claim 1, wherein said housing
includes a tube rotatably received therein, said sheet material is
wound around said tube.
- 10 3. The pen as claimed in claim 2 further comprising means for
rotating said tube relative to said housing.
4. The pen as claimed in claim 3, wherein said rotating means
includes a casing rotatably attached to said housing, and coupled to
said tube, to rotate said tube relative to said housing.
- 15 5. The pen as claimed in claim 4, wherein said casing includes
at least one notch formed therein, said tube includes at least one jut
extended therefrom to engage into said at least one notch of said
casing, and to anchor said tube to said casing.
6. The pen as claimed in claim 4, wherein said tube includes a
20 peripheral rib extended therefrom to engage with said casing.
7. The pen as claimed in claim 2, wherein said housing
includes an anchor device disposed therein and engaged with said
tube to guide said tube to rotate relative to said housing.
8. The pen as claimed in claim 7, wherein said tube includes a
25 plurality teeth provided thereon, said anchor device includes a
plurality teeth provided thereon, and engageable with said teeth of
said tube.

9. The pen as claimed in claim 8, wherein said tube includes a plate provided thereon and having said teeth provided on said plate.

10. The pen as claimed in claim 7, wherein said housing includes at least one guide rib extended therefrom, said anchor
5 device includes at least one guide groove formed therein to slidably receive said at least one guide rib of said housing, and to guide said anchor device to slide relative to said housing, and to prevent said anchor device from rotating relative to said housing.

11. The pen as claimed in claim 7 further comprising means for
10 biasing said anchor device toward and to engage with said tube.

12. The pen as claimed in claim 1 further comprising means for moving said ink reservoir relative to said housing.
